Shailesh MS

Senior QA Automation Engineer | Python | PyTest | Robot Framework | API | Mobile | CI/CD | AI-assisted QA

Bangalore, India
shaileshms18@gmail.com | +91 9845053978 | LinkedIn: www.linkedin.com/in/shaileshms

CAREER SUMMARY

Software Quality Engineer with 4.5+ years of experience in Python-based test automation, web, mobile, API and system testing. Strong experience in developing scalable automation frameworks using Python, PyTest, Robot Framework, Selenium, Appium and Playwright. Experienced in developing custom Python keywords and reusable libraries for Robot Framework, API automation, SQL validation, and CI/CD integration using Jenkins and Azure DevOps. Hands-on experience in functional, integration, regression, end-to-end, system and performance testing across Printing & Imaging, Smart Lighting/IoT, HVAC and mobile application domains. Experienced in AI-assisted QA automation, Agile methodologies, defect management and cross-functional collaboration.

SKILLS

• QA: Web Testing, API Testing, AI-driven Testing, Functional Testing, Non-functional Testing, System Validation, Integration Testing, End-to-End Testing, Regression Testing
• Testing Tools: Selenium, Postman, Swagger, JMeter
• API Testing: REST API, Python Requests, Postman, Swagger
• Programming: Python
• Automation Frameworks: PyTest, Robot Framework, Selenium WebDriver, Playwright, Appium, XCUITest
• Robot Framework: Custom Python Keywords, Reusable Libraries, Keyword-Driven Testing.
• Database: SQL, MS SQL Server
• CI/CD: Jenkins, Azure DevOps
• Version Control: Git, GitHub
• Project Management: JIRA, TestRail, Confluence
• Methodologies: Agile, SDLC, STLC
• AI/Gen AI: Generative AI, Prompt Engineering, GitHub Copilot, AI-assisted Test Automation, AI Agents, Self-Healing Automation.
• Soft Skills: Communication, Critical Thinking, Analytical Skills, Problem Solving, Debugging, Collaboration

PROFESSIONAL EXPERIENCE

Mphasis Ltd. Client: HP

Senior QA Automation Engineer | Jan 2026 – Present

• Developed reusable automation components for complex business workflows, improving framework scalability and maintainability.
• Designed and implemented scalable automation frameworks, reducing automation development effort by 35–40%.
• Achieved 95% automation coverage using Python, Selenium, and REST APIs.
• Developed reusable utility methods and centralized configuration management.
• Built reusable API wrappers, used Pytest fixtures, implemented Page Object Model, and created parameterized test cases.
• Integrated **AI-driven QA agents** including Test Manager, Review Manager, QA Review Manager and Jira Integration Agent into the testing workflow.
• Reduced manual QA effort by 70–80%.
• Handled sprint planning, daily standups, estimation, regression execution, defect tracking, Jira management, and release validation.

L&T Technology Services — Client: Eaton

Senior Test Engineer | Oct 2023 – Dec 2025

• Developed and maintained scalable and reusable automation framework using Python, Appium, XCUITest and Pytest.
• Worked on automation testing of a mobile application supporting Android and iOS platforms.
• Executed tests across physical devices, emulators and simulators with multiple OS versions.
• Performed UI and API testing and converted 50+ UI tests into API tests.
• Integrated automated test suites into Jenkins CI/CD Pipelines, enabling daily builds and reducing test execution time by 30%.
• Prepared test plans, test cases, and test reports; reported more than 50 production defects.
• Followed Shift Left testing, documented QA best practices and collaborated closely with developers and managers.

L&T Technology Services — Client: Carrier

Test Engineer | Nov 2022 – Sept 2023

• Independently led a Proof of Concept (POC) for web automation using Robot Framework and Python and presented the solution to the client.

• **Developed custom Python keywords and reusable Robot Framework libraries** to extend framework functionality and support project-specific automation requirements.

• Automated 90% of test cases using Python and Robot Framework.

• Performed REST API testing using Requests library for backend validation and data verification.

• Developed reusable automation components and keyword-driven test cases to improve maintainability and test coverage.

• Performed functional, regression, integration and exploratory testing of web applications.

• Participated in code reviews, followed automation framework best practices, and trained new QA engineers.

• Integrated automated test execution with **Jenkins CI/CD pipelines** for faster feedback.

L&T Technology Services — Client: Signify

Trainee Engineer | Dec 2021 – Oct 2022

• Analyzed business and functional requirements and prepared comprehensive test scenarios, test cases and test data.

• Performed UI testing to verify functionality, usability, navigation and error handling scenarios.

• Validated lighting operations such as ON/OFF control, brightness adjustment, lighting scenarios, schedules, and configuration changes.

• Performed device-to-application integration testing to verify communication between smart lighting devices and the application.

• Executed 60+ manual test cases covering Vendor Management, Inventory, Shipment Tracking, and Order Management.

EDUCATION

• Bachelor of Engineering (CS) — KVG College of Engineering | June 2017 – Aug 2021

ACHIEVEMENTS

• Independently led and presented a Robot Framework + Python automation POC to the client, contributing to the transition of the project toward automation.

• Developed reusable Python keywords and Robot Framework libraries for project-specific automation requirements.

• Mentored new QA engineers on automation practices and project workflows.

CERTIFICATIONS

• Selenium WebDriver with PYTHON from Scratch + Frameworks.

• Learn JMETER from Scratch on Live Apps - Performance Testing.

• Learn API Automation Testing with Python & BDD Framework.

• Playwright with Python & Pytest.

• Gen AI & AI Agents for QA Automation | Copilot & Claude code,

• AI-based Software Testing
